Insight Client Event

Friday 6th March 2009

Register today: www.uk.insight.com/event

The Insight Client Event returns to Old Billingsgate on Friday 6th March 2009, providing you the usual mix of cutting edge technology, engaging keynotes and over 70 of the worlds leading hardware, software and solutions providers.

Focussing on the key issues facing the UK IT community today, the event will offer insight into:

- » Cloud Computing
- » Virtualisation
- » Unified Communications
- » Mobile IT

The event will offer the chance to interact with some of the leading minds in these technology fields. We have also invited Google along this year – an organisation that has proven itself as a catalyst for change and has become embedded in our day-to-day working lives.

The Insight Client Event gives you the opportunity to engage in a day of thought provoking conversations or simply a chance to play with some of the latest products available in a relaxed, informal environment.

Insight Client Event

2009

The Insight Client Event gives you the chance to:

- View the latest and most innovative technologies from world leading manufacturers on display and demonstrated live.
- Attend one of three stimulating keynote speeches delivered by the UK's leading technology minds, including a Keynote by Google.
- Visit the Software Briefing Centre to hear about the latest developments in the software landscape.
- See a live network demonstration showcasing the latest Cisco technologies
- Visit the internet cafe or use our wireless network to check your email whilst visiting the show.
- Have a coffee on the banks of the River Thames and enjoy lunch courtesy of Insight.

Don't forget to register!

Please contact your Account Manager if you require any further details

HP EliteBook 6930p Notebook PC

Corporate elite. Serious business, rugged features, 14.1-inch diagonal display

The HP EliteBook 6930p sets a new standard for on-the-move productivity with all-day battery life and business-rugged features. With a starting weight of only 2.1 kg, this newly-designed notebook meets the military standard MIL-STD 810F for vibration, dust, humidity, altitude, and high temperature.

Empower your business

Strengthen security measures and remotely monitor, diagnose, and repair PCs over the network with Intel® Centrino® 2 with vPro™ technology. Benefit from the mercury-free, 14.1-inch diagonal widescreen Illumi-Lite LED display which is lighter and more energy-efficient than standard CCFL display technology, and integrated Intel graphics.

Enjoy wireless in more places

Whether you're across the street or across the country, integrated 3G: WWAN, Wi-Fi CERTIFIED™ WLAN and Bluetooth® help you stay connected in more places.

HP Professional Innovations help you focus on your business

Built to last. Enhanced reliability features such as HP DuraCase, HP DuraKeys, HP DuraFinish, and HP 3D DriveGuard give you a durable device that has been tested at extreme temperatures of 60°C and –29°C and withstands bumps, vibrations, and high humidity, so your notebook can go the distance.

Built to simplify. Boost your productivity while maximizing ease of use. The 2 MP Webcam with Business Card Reader software means you will never forget a name, e-mail or phone number. The webcam is also perfect for video, web conferencing, and VoIP. Take advantage of the HP accessory portfolio for a better computing experience.

Built to protect. An array of multi-layered, customizable security solutions help defend your network, your applications, and your data.

- Intel® Centrino® 2 with vPro™ technology Core 2 Duo P8400-2.26GHz

Cost Effective Infrastructure through Intelligent Manageability

Affordable, easy-to-use, advanced servers that aim to increase productivity and solve real problems and challenges faced by your business

Some of the features that enable IBM servers to keep you ahead of the game include:

- **IBM Director**. A self-monitoring technology that can manage and optimise many systems across many environments. All from a central console.
- **IBM Predictive Failure Analysis**. Warns you of problems with your hard disk drives, fans, power supply units, memory, central processing units and voltage regulator modules - before they actually become problems. Up to 48 hours in advance.
- **IBM Active Energy Manager**. An intelligent power and cooling feature that can save needless expense by managing and controlling the power consumption of your data centre.
- **Light Path Diagnostics**. An external LED panel helps you identify and locate hardware problems quickly (on select models).

IBM System x3650 Express

Help Keep your Data Safe and Accessible

The x3650 is a stable business-critical application server that minimizes deployment and support costs. For constrained data center environments, the IBM System x3650 offers unprecedented performance and reliability. Optimised for up to four core processor performance, the x3650 delivers rack-dense, multi-core computing power, an impressive 12 DIMM memory design and super-efficient network communication.

- 1 x 2.0 GHz Intel Quad-Core Xeon E5405
- 2GB PC2-5300 RAM expandable to 48GB max
- 6 Hot-swap SAS drive bays / Integrated Gigabit Ethernet
- 3 years warranty

Buffalo TeraStation Pro II - 4TB NAS

Multi-Disk Network Attached Storage

This all-in-one intelligent Network Attached Storage (NAS) system is delivered complete with four high speed SATA hard disks providing up to 4TB of centralised data storage.

Running a pre-installed Linux based operating system for maximum reliability, administrators can choose between various setup modes including standard or RAID 0, 1, 5, 10. Also supporting Active Directory, the system allows administrators to import user names/passwords from an existing Active Directory structure. Integrated to the rear of the unit is two USB2.0 ports to which additional USB External Hard Drives can be attached. Other features include an integrated UPS port and LCD screen for information in relation to the systems operating status. The front bezel can be locked to provide physical protection for the internal hard disks.

- Available in 1TB, 2TB & 4TB capacities (4 x high-speed SATA hard drives)
- Available in desktop or 2U 19" rack
- New iSCSI TeraStation Pro II Now Available
- Five operational modes: Standard, RAID 0, 1, 5, 10
- Supported OS: Win Server 2003/2000/XP/Vista& Mac OS X 10.3 or higher

MASSIVE CAPACITY

Mobiu The Secure Portable Office

Your data is backed up, secured and available through any online PC using a smart, multi-function USB. The service works on any online Windows XP or Vista PC and backs up your data to a secure online data-centre, enabling remote working and file sharing in secure and access-controlled online workspaces.

With Mobiu, your data isn't just backed up, you take your office with you wherever you go. That's access to all your files, internet browser and portable applications for word processing, spreadsheets and presentations, as well as access to shared workspaces with colleagues and clients.

- Remote access is simple and inexpensive at last– users can work anywhere there's access to an online PC – great for home working or hot desking.
- Easy and quick to create "on-the-fly" secure IT networks – excellent for file sharing in temporary or small networks, collaboration with other businesses or transferring large files securely.
- No more data loss! Mobiu users enjoy real peace of mind with a total backup solution and disaster recovery in the palm of their hand.
- It's secure - Mobiu patented Chip and Pin technology ensures data is locked down tight and leaves no record of the users activity on the computer.

Here's What's Included With Your Mobiu Service:

- Unique Mobiu "Chip & PIN" key with 1GB secure flash memory
- Mobiu backup, remote access, file sharing and document management applications
- Softmaker word processing, spreadsheet and presentation **software worth over £60**
- Firefox web browser, PDF reader and Zip applications
- From 5GB of secure online storage

As easy as a USB stick but infinitely more clever, Mobiu offers you and your company control over your data, increased productivity and vital cost reduction on IT and Computers.

Applications Suite | Internet Browsing | MobiManager | MobiRooms | Mobiu Key | Mobiu Trusted Users | MobiVault

£126.99 ex VAT ASK FOR MBU100R2

The Secure Portable Office

The new online service, protected and managed using a smart, multi-function USB Key.

- **BACKUP** your computers in the secure online data-centre
- **PROTECT** your data with the unique "Chip and PIN" USB Mobiu Key
- **ACCESS** your files, run applications, browse and work remotely from any online PC leaving no trace
- **SHARE** folders and large files, track and control access to data in secure online workspace

As easy as a USB stick but infinitely more clever.

Quantum: Why Upgrade to Tape Automation?

Quantum is a global leader in storage and has over 25 years of dedicated experience in the backup, recovery and archive market. With the widest portfolio of products from tape drives to media through to automation and disk based backup, Quantum caters for the full spectrum of modern business requirements.

Helping your Customer Select their Backup Hardware

Large businesses that back up huge amounts of data rely on tape libraries with multiple drives and cartridges, but most small or mid-sized business environments choose either an autoloader solution or a single tape drive attached to a server. Whether you decide to invest in a single tape drive or autoloader solution depends on a number of factors, including your capacity requirements, speed of data transfer and human resources available to manage the backup process. A single drive attached to a server is a simple, cost-effective solution ideal for less data-intensive environments and Quantum's tape drive advisor tool on www.quantum.com can assist with which tape drive is most appropriate to accommodate your backup requirements. For more data intensive environments or in situations where backup requirements are anticipated to grow, automating the backup process through an autoloader product can provide the following benefits:

- Automates much of the backup process across multiple cartridges to enable an unattended backup process
- Eliminates human error as human intervention is only necessary when inserting and removing tapes – such as for offsite purposes
- Some autoloaders have the ability to add an additional magazine for cartridges to avoid buying a new product when capacity demands grow.

The Award-Winning Quantum SuperLoader 3™

Rack-Mountable - 2U

When simplicity, reliability and the most value for money is needed in a tape autoloader, the Quantum SuperLoader 3 is the right choice.

- Tape automation for almost the price of a standalone drive!
- SuperLoader 3 with DLT-S4 and with LTO-4HH are the highest capacity autoloaders on the market; and deliver up 12.8TB of native activity with over 25.6TB of compressed capacity
- Expands from 8 to16 cartridge slots to protect investment as storage needs grow
- Native fibre channel available with LTO-3 and DLT-S4 models to support SAN environments
- Complete 'backup ready' Solution including Symantec Backup Exec™ QuickStart software, cables, and data and cleaning cartridges
- Includes StorageCare Guardian remote management solution, barcode reader and labels, mounting kit and cabling
- Offers widest range of drive options on the market: DLT VS160, DLT-V4, LTO-2 HH, LTO-3, LTO-4, SDLT 600 and DLT-S4.

Microsoft Windows Server 2008

Windows Server 2008 delivers valuable new functionality and powerful improvements to the core Windows Server operating system to help organisations of all sizes increase control, availability, and flexibility for their changing business needs. New Web tools, virtualisation technologies, security enhancements, and management utilities help save time, reduce costs, and provide a solid foundation for your information technology (IT) infrastructure.

Microsoft GOLD CERTIFIED Partner

Built for the Web

Windows Server 2008 includes improved Web administration, diagnostics, development, and application tools with Internet Information Services 7.0 (IIS 7.0), a major upgrade from IIS 6.0. Windows Server 2008 unifies the Microsoft Web publishing platform, including IIS 7.0, ASP.NET, Windows Communication Foundation, and Windows SharePoint Services.

Virtualisation

Windows Server 2008 Hyper-V, the next-generation hypervisor-based server virtualisation technology, allows you to consolidate servers and use hardware more efficiently. Several enhancements to Terminal Services (TS) improve presentation virtualisation. And simpler licensing terms makes using these technologies more straightforward.

Security

The Windows Server 2008 operating system is hardened, integrates several identity and access technologies, and includes multiple security innovations to more easily deploy a policy-driven network that helps protect your server infrastructure, your data, and your business.

A Solid Foundation for Your Business Workloads

Windows Server 2008 provides a solid foundation for all of your server workload and application requirements while being easy to deploy and manage. Hallmark Windows Server reliability and enhanced high availability features help ensure your critical applications and data are available when you need them.

Windows Server 2008 and Windows Vista Better Together

Windows Vista and Windows Server 2008 originally began as part of a single development project, and as such they share a number of new technologies across networking, storage, security and management. Although the development of Windows Vista and Windows Server 2008 have branched into separate releases with different release cycles, many of these enhancements apply to both Windows Vista and Windows Server 2008. When organisations deploy both operating systems, they will see how the combined client-server infrastructure provides even greater advantages.

MORE REASONS TO UPGARDE

Server Consolidation and Resource Optimisation - Hyper-V

» Hyper-V helps organisations to achieve optimal use of their hardware resources and provides the agility needed to adapt to changing IT needs.

Flexible Application Access for Remote Users - TS RemoteApp

» Provides improvements and innovations to Terminal Services with solutions, like Terminal Services RemoteApp (TS RemoteApp).

Modular, Minimal Installation - Server Core

» The new Server Core installation option provides a minimal environment for running specific server roles.

Delivering Rich Web Content and Applications - IIS 7.0

» IIS 7.0 delivers solutions for today's demanding content, including streaming media and Web applications in Active Server Pages and PHP.

Improved Network Performance and Control - New TCP/IP Stack

» The redesigned "next generation" TCP/IP included in Windows Server 2008 provides vastly improved performance in a remote location scenario, offering faster throughput and more efficient routing of network traffic.

Preventing Unhealthy Devices from Connecting to the Network - NAP

» Network Access Protection (NAP) in Windows Server 2008 helps prevent non-compliant computers from accessing an organisation's network.

Supporting Business Continuity for Demanding Workloads - High Availability Features

» provides increased scalability for the most demanding business solutions and helps keep businesses operating through unplanned downtime with high availability features.

Enabling Secure Collaboration - Active Directory Federated Rights Management

» Rights Management Services enables organisations to control how documents are used - including who can view them, whether they can be printed, even whether they can be forwarded or deleted - both internally and externally.
